[70% of Programming Is "The Muck That Slows You Down"](#)

[reply](#) In his speech to the 2006 MIT Emerging Technologies Conference, Amazon.com founder Jeff Bezos noted that about 70% of a project's time and effort is spent on tasks that, while important, do not differentiate a product or a business in any way from its competitors. Bezos suggested that such features, or "muck," may be outsourced to third parties. [More...](#) (Tags: [methodology](#), [opinion](#), [trends](#))

[If Neat Freaks use Java, and Slobs use Ruby, who uses ML?](#)

[2 replies](#) ML is a programming language featuring type inference: you don't have to encumber your code with type declarations, the compiler can figure them out for you. So... are type inference languages

like ML for neat freaks or slobs? Or someone else entirely? [More...](#)
